PROFESSIONAL PROFILE

Frontend Developer specializing in React and TypeScript with a track record of building responsive, user-centric web and mobile applications. Adept at bridging the gap between design and engineering by translating complex Figma prototypes into scalable code, with hands-on experience integrating modern backend solutions to deliver high-performance digital experiences.

SKILLS

- **Core Languages:** JavaScript, TypeScript, HTML5, CSS3, Java, Python, Lua
- **Frameworks & Libraries:** React, Node.js
- **Backend & Databases:** Supabase, MySQL, MariaDB, Prolog
- **Tools & Design:** Figma, Canva, Git/GitHub, VSCode, Android Studio, Docker

PROFESSIONAL EXPERIENCE

Ecosystem for Sustainable Commerce in Agriculture (ESCA)

Software Developer | Remote | January 2026 – Present

- Architected and developed dynamic frontend features for an agricultural commerce platform utilizing React and TypeScript
- Engineered a secure Co-op Admin Settings Page integrated with a Supabase database to efficiently fetch and display cooperative and DTI registration data
- Bridged the gap between design and engineering by transforming high-fidelity Figma UI/UX prototypes into functional, responsive web and mobile components
- Maintained rigorous code quality and managed application state through active debugging and collaborative pull request reviews

NOAH Business Applications

Development Intern | Remote | June 2025 – July 2025

- Accelerated the development and testing lifecycle of enterprise business software solutions to support direct client requirements
- Implemented scalable new features and resolved critical application logic bugs using modern development frameworks
- Produced comprehensive technical documentation and participated in peer code reviews to ensure software reliability and adherence to best practices

FEATURED PROJECTS

Philippine Road Damage Detection System | Mobile Frontend Developer

- Engineered a mobile data-collection application using Kotlin and the Jetpack library to capture and geotag media for real-time cloud analysis
- Architected the user interface and user experience workflows in Figma, translating designs into a highly functional mobile prototype optimized for field conditions
- Integrated the ArcGIS Maps SDK to dynamically render JSON responses from a Spring Boot backend, mapping precise GPS coordinates and damage severity markers on an interactive topographic basemap
- Managed secure RESTful API communications for high-latency video and image uploads, ensuring synchronized data transmission

Exit Interview Web Application | Frontend Developer

- Developed a streamlined, visually compelling portal for exit processing workflows using HTML, CSS, JavaScript, PHP, and NodeJS

EDUCATION & ACHIEVEMENTS

Saint Louis University | Baguio City, PH

Bachelor of Science in Computer Science | July 2026

- **Awards:** Dean's Lister, 2nd Place MPTC Innovation Olympics (2024)
- **Certifications:** Lean Six Sigma Yellow Belt (2025), Project Management Fundamentals (2025)
- **Leadership:** Deputy Director for E-Sports, Committee on Sports and Athletics
